The question

Diving is getting more and more practiced in the world but

- **Thousands of accidents called decompression sickness happen every year**

- **They happen even if decompression stops are properly applied**

- **20 million divers are exposed to this risk**

The solution

O'Dive is an IOT helping divers to adapt their diving practice and better prevent decompression sickness

- **Patented technology**
- **CE approval & qualified with professional divers**
- **150 recreational clients 2 months after product launching**

The team

- **7-people (diving safety, big data, IOT) offering consulting missions for worldwide professional divers (2010-2018)**

- **Having developed a unic technology in the field of diving safety**

- **Entering recreational market in Q3/2018…**
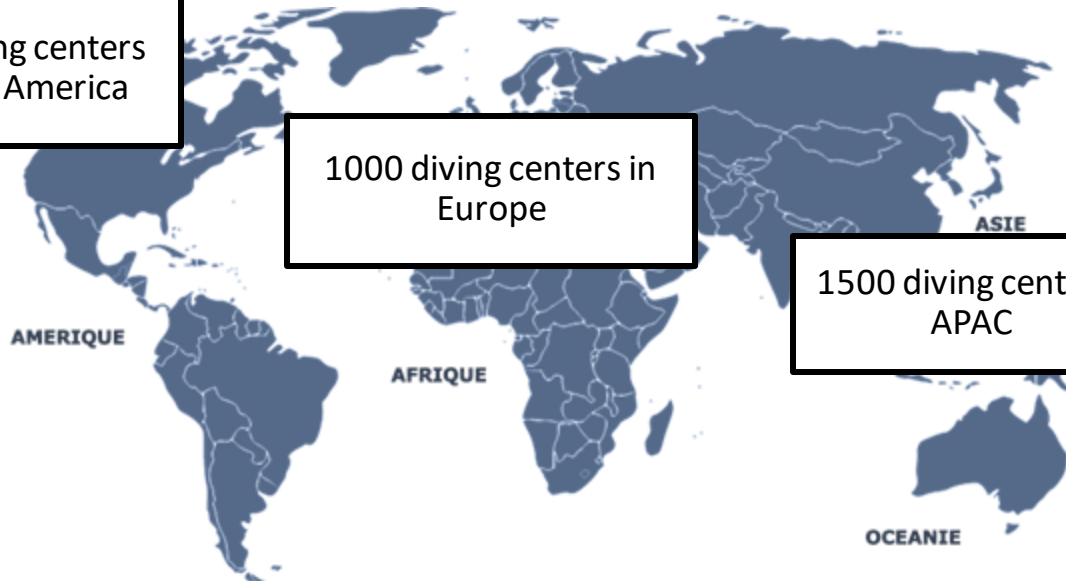

*References:*

Ambition: global market

1500 diving centers in North America
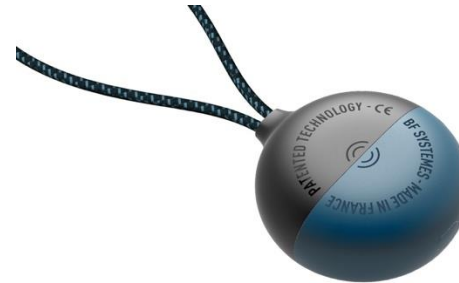

1000 diving centers in Europe

1500 diving centers: APAC

clients

- **Target: more than 1,000,000 clients worlwide within 5 years and a margin of 15 M$**

- **Next stage: upgrade techno for precision medicine program & IA for individualized risk assessment**
